## EXCELLENCE IN ENERGY EFFICIENCY THREE YEARS IN A ROW!

### RECOGNIZED AS THE MOST EFFICIENT OF ENERGY STAR® IN 2013, 2014 AND 2015

Preservation Windows, when purchased with qualifying EnergyMaxx® insulated glass packages,† have earned the ENERGY STAR Most Efficient 2015 designation for meeting rigorous ENERGY STAR criteria, which includes achieving highly efficient U-Factor and SHGC (Solar Heat Gain Coefficient) performance in all four U.S. climate zones.

- U-Factor represents the window's resistance to heat flow. The lower the U-Factor, the better the window's insulating quality, which helps reduce fuel consumption for heating during winter months.
- SHGC represents the window's ability to prevent solar heat from penetrating your home during the summer. The lower the SHGC, the more you'll conserve on air-conditioning.

### GET THE ENERGY-SAVING ADVANTAGE!

Take a closer look. Preservation Windows expertly combine innovative design, precision manufacturing and superior insulating components – including high-performance glass systems – to deliver year-round energy savings. Ask your Preservation Dealer to help you choose the ideal glass package to meet the ENERGY STAR requirements for your home and climate zone.

#### PRESERVATION WINDOWS RECOGNIZED AS MOST EFFICIENT 2015

WINDOW PERFORMANCE¹	U-FACTOR	SHGC
<b>DOUBLE-HUNG</b>		
9001	0.18 - 0.20	0.23 - 0.27
Clear Glass Unit	0.43	0.54
<b>SLIDING</b>		
9002, 9003, 9009	0.19 - 0.20	0.23 - 0.27
Clear Glass Unit	0.43	0.54
<b>PICTURE/FIXED</b>		
9014	0.19 - 0.20	0.20 - 0.27
Clear Glass Unit	0.44	0.61
