PRESERVATION BOARD & BATTEN

CLASSIC VERTICAL SIDING FOR GOTHIC
REVIVAL, VICTORIAN, CRAFTSMAN, COASTAL
OR CLASSIC COLONIAL ARCHITECTURE

AUTHENTICALLY PROPORTIONED

Preservation Board & Batten Siding reproduces the distinguishing details of classic board and batten siding installations. A stately 5 1/2" board face is accented by a delicate 1 1/2" batten that projects 1/2" above the board surface. The aesthetically pleasing proportions, combined with the emphatic bold shadow lines created by the battens, produce a look of refined elegance.

THE NATURAL LOOK OF WOOD

The natural grain texture captures the appearance — and even the feel — of the milled boards used in classic 19th century homes. Premium thickness provides unparalleled durability.

EVERYTHING BUT THE SMELL OF FRESH PAINT

To assure authenticity in every detail, Preservation Board & Batten Siding is made with a smooth, low-gloss finish that looks as if it were applied with a painter's brush. And the best part is, that look will last forever.

PRESERVATION SOFFIT & VERTICAL SIDING

SOFFIT: SUPERIOR STRENGTH AND BEAUTY

Preservation Premium Soffit combines the beauty and performance of wood with the durability and easy-care convenience of vinyl.

VERTICAL SIDING: THE PERFECT ACCENT

Add visual emphasis to gable ends, entryways, dormers or other accent areas of your home with Preservation Vertical Siding. It's a perfect opportunity to design an exterior that fully reflects your individual tastes and desires — one that sets your home apart.

PAINTED WOOD APPEAL

Deep, realistic shadow lines combine to make Preservation Premium Soffit the easy choice. Its gently rounded edges, elegant 3 1/8" exposure width, and finely textured, low-gloss finish evoke the look and feel of custom-milled, painted wood.

SUPERIOR RIGIDITY

Our proven UltraBeam® technology keeps the panels flat and level for exceptional beauty year after year. This unique design allows Preservation Premium Soffit to easily span long runs without sagging and cupping is virtually eliminated.

INVISIBLE VENTILATION

Continuous airflow is vital to keep attics cool and dry, yet the appearance of vented panels can be less than ideal. Preservation Premium Soffit features invisibly vented panels to provide functional beauty.

EASY-CARE CONVENIENCE

Wood soffit looks good, but it can warp and rot after exposure to dampness. Preservation Premium Soffit is made with weather-resistant vinyl, so rain and humidity don't cause problems. An occasional rinsing with a garden hose is all it takes to restore like-new beauty.

PRESERVATION SHAKES & SCALLOPS

SHAKES

Preservation Shakes provide historical elegance and superior resistance to weather . . . just like the original.

SCALLOPS

Preservation Scallops are often used to highlight special architectural areas such as gables, window boxes and eave edges or to create frieze boards and bands.

CAPE COD SHINGLES

The clean lines and basic fundamentals of our Cape Cod Shingles beautifully capture the welcoming, easy-care ambiance of the picturesque New England shoreline.

HAND-SPLIT SHAKES

Enrich your home's character with the classic beauty and rugged, natural texture — perfect for the entire home or as detailed accents.

GALE FORCE 5 TECHNOLOGY ensures Preservation stays put regardless of the weather. Each panel is manufactured with a strengthening 1/4" storm rail on each side of the nailing hem. As a result, in independent tests, Preservation Shakes and Scallops withstood hurricane-strength winds.

SEASON-4 TECHNOLOGY ensures our Shakes and Scallops can be installed in most any weather. Temperature lines on the nailing hem allow installers to match up the current temperature to its corresponding mark, allowing optimal room for expansion or contraction.

PRESERVATION TRIMWORKS

DISTINCTIVE ACCENTS FOR A DISTINCTIVE HOME

Decorative details are the accents you incorporate to add interest, appeal and individuality. Trimworks accessories create lasting distinction and enhance the beauty, protection and value of your Preservation Siding. Trimworks accessories provide the elegant graciousness of their handcrafted wood counterparts, without the upkeep.

WINDOWS

Choose from various widths of window trim which complement your siding and design.

ENTRYWAYS

Door trim is one of the most important exterior design decisions you can make, as it's often what visitors see up close.

CORNERS AND VERTICAL COLUMNS

Corners help define the proportions of a home. This is why the creative use of corner treatments can make a big impact.

FINISHING TOUCHES DECORATIVE DETAILS ADD INTEREST, APPEAL AND INDIVIDUALITY TO YOUR HOME

5" fluted lineals as a door surround

Beaded corner post

3 1/2" insulated lineal window trim (5" also available)

4" traditional corner post with foam insert

ADDS BOTH ENERGY EFFICIENCY AND COMFORT
TO YOUR HOME. ENJOY THE PEACE OF MIND
THAT COMES FROM CHOOSING THIS SUPERIOR
HIGH-PERFORMANCE SIDING.

VINYL SIDING INSTITUTE

The Vinyl Siding Institute (VSI) sponsors independent, unbiased certifications of vinyl siding performance. Preservation Siding, Preservation Integra™ and Board & Batten have been certified under a VSI program to meet or exceed the rigorous battery of tests known as ASTM D3679 (vinyl siding) and ASTM D7795 (insulated siding) — the long-standing, accepted industry standard for quality vinyl siding, as well as D6864, VSI's color retention standard.

Consult the VSI website at www.vinsiding.org for a current list of certified products and colors.

Thanks to the certification program's third-party testing and inspection process, you are assured that Preservation Siding, when installed according to our instructions, will meet or exceed the industry standard for quality and performance. In addition, you are assured that Preservation Siding will maintain a uniform color over time, lay straight on a flat wall, and withstand the effect of normal seasonal temperature fluctuations.

PRESERVING CHARACTER TAKES CHARACTER

THAT'S WHY PRESERVATION IS ONLY OFFERED THROUGH AN EXCLUSIVE DEALER NETWORK.

We continually strive to meet the demands of homeowners who, like you, want the best. Our Preservation dealers are Dealers of Distinction, with one goal: PRESERVING THE CHARACTER OF YOUR HOME and your peace of mind.

Ours are the dealers who look beyond just selling products. They're much more. They're home improvement Design Specialists who possess the expertise to match the Preservation products that best suit your character and your home's uniqueness.

- ✓ Design Specialist
- ✓ Solutions Provider
- ✓ Experienced Dealer

PRESERVATION IS PREMIUM

As a manufacturer of fine siding and windows, we offer an industry-leading, LIFETIME transferable WARRANTY.* Therefore, it's important that our DEALERS HAVE A STRONG REPUTATION AND CHARACTER. Every Dealer of Distinction is sure to possess these key attributes:

- High Quality Installation & Service Standards
- Design Expertise
- Established, Consistent Reliability
- Results-Oriented Consulting for Energy Solutions
- Solid Reputation in the Community and Industry
- High Rate of Customer Referrals

Superior service is part of the Preservation experience and Dealers of Distinction pass the true test of customer care. Because of the value placed on building a long-term relationship, service does not end after installation of the product. Extra attention to technical, product, and customer support are efforts that distinguish your authorized dealer from ordinary contractors.

THE PRESERVATION COLLECTION

SIDING WINDOWS ACCENTS

PRESERVATION DELIVERS

ENHANCED THERMAL EFFICIENCY

Preservation siding with ClimaShield Thermal Support delivers enhanced installed R-value. This translates into an energy efficiency improvement and added interior comfort versus ordinary vinyl siding.

MORE THAN FIVE TIMES THE IMPACT RESISTANCE

Preservation Siding with ClimaShield delivers an IR rating of 340 psi. That's five times the impact resistance of ordinary siding.

500% MORE BREATHABILITY

With a perm rating of 5, ClimaShield is a "vapor breather," not a vapor barrier. It will not support the growth of mold or mildew or contribute to "sick home syndrome." Independent tests have proven it will not absorb or retain moisture.

ADDED RESISTANCE TO HURRICANE-FORCE WINDS

Preservation High-Performance Siding features a unique, double thick rolled-over nail hem and ClimaShield prevents wind from getting under the siding to lift and tear it.

PROTECTS AGAINST TERMITES

ClimaShield contains an organic, safe ingredient that prevents termites and other pests from nesting behind your siding, yet it is non-toxic for humans and pets.

TESTED, PROVEN AND WARRANTED

Preservation High-Performance Siding has been tested by independent laboratories and proven to deliver exclusive benefits including exceptional energy efficiency and durability.

SUSTAINABLE BY DESIGN

WITH PRESERVATION, YOU'LL USE LESS ENERGY AND SAVE MORE MONEY

Choose Preservation Siding for beauty and energy efficiency. The same properties that make it impact and dent-resistant make it insulate as well. This means your home will be warmer in the winter and cooler in the summer therefore using less energy year-round.

LESS WASTE, MORE PRODUCT

Less waste is created during manufacturing. Scrap and off-spec material is reprocessed into new vinyl products meaning almost zero waste.

A GREEN HOME IS A HEALTHIER HOME

Preservation delivers superior interior quality due to its advanced insulation properties. As a result, moisture behind the siding is reduced and mold and mildew buildup is eliminated. This directly affects the air inside your home, making it cleaner and healthier to breathe. In addition, outside noise is significantly reduced so your home environment is peaceful and comfortable.

BE ECO-FRIENDLY. CHOOSE VINYL

Vinyl siding is recognized by the USGBC, LEED for Homes program as environmentally preferable:

- Insulated siding adds additional R-value to wall systems.
- Vinyl is lightweight, so less energy is consumed during transportation.
- Vinyl siding manufacturers recycle the in-plant scrap, ensuring minimal waste.

THE PRESERVATION DIFFERENCE UNIQUE ULTRABEAM® PANEL DESIGN

ENHANCE AND PROTECT YOUR HOME'S VALUE AT THE SAME TIME

Preservation Siding delivers upmost quality with its unique UltraBeam® design. An advanced nail hem and locking system provides added rigidity to the entire panel for superior siding performance. Plus, with its straight lines, smooth even walls, and top-to-bottom beauty, Preservation Siding is the ideal choice for both new construction and remodeling projects.

Double thick nail hem and advanced locking channel for secure wall attachment

3/4" mid-panel butt height adds lateral stability and beautiful shadow lines

Sure-grip bottom tab locks securely to lower panel

THE PRESERVATION HIGH PERFORMANCE SIDING SYSTEM: WORRY-FREE FOR A LIFETIME WE GUARANTEE IT

Backed by an industry-leading warranty* that even includes fade and hail protection.

Helps protect against damage from hail, rain and the shear force of winds up to 200 mph.

Designed to withstand damage from impact.

*See printed warranties for complete details.

EXCLUSIVE CLIMASHIELD® THERMAL SUPPORT SYSTEM

The ClimaShield® Thermal Support System is made with exclusive MPS technology and molded to fit the contour of Preservation Siding perfectly. A unique manufacturing process ensures superior insulation and resistance to impact and weather.

HIGH-PERFORMANCE SIDING

Preservation Siding with ClimaShield Thermal Support System is a completely engineered wall system that dramatically increases energy efficiency and offers intrinsic protection against sagging, hail damage, wind, noise and mishaps.

ORDINARY SIDING

Ordinary siding is installed over flat underlayments that provide virtually no support or thermal benefit. This incomplete wall system is vulnerable to denting, bowing, sagging, noise penetration and air movement.

INTERLOCKING WEATHER SEAL

ClimaShield's ship-lap profile creates a complete weather seal all the way around each panel. As a result, your Preservation High-Performance Siding will wrap your home in a blanket of comfort and energy efficiency.

DIAMOND GROOVE DRAINAGE PLANE

Exclusive drainage channels direct moisture away from interior walls.

A DESIRED LOOK WITH ALL THE BENEFITS

PRESERVATION INTEGRA™

Introducing Preservation Integra, the high-performance insulated wall system that ingeniously integrates strength, beauty, and energy efficiency.

INSULATED FOR BEST ENERGY EFFICIENCY

Up to 1-1/2" thick insulation** provides exceptional R-value for comfort and year-round energy savings.

RESISTANCE TO EXTREMES OF WIND AND WEATHER

Preservation is designed to remain securely fastened, with no tearing or rattling, even in extreme winds.

RESISTANCE TO DENTING, SCRATCHING AND EVERYDAY ABUSE

The durable surface of Preservation and contoured underlayment protect against the pounding force of hail-storms and repel the worst downpours.

INTERLOCKING PANEL CONFIGURATION

The unique and durable design of Integra's stacklock system creates a tight, secure fit.

INSPIRED BEAUTY

39% longer siding length creates a beautiful finished appearance.

**Nominal, including foam insulation.

PRESERVATION INTEGRA'S precision contoured insulation bonds securely to the siding panel creating an integrated system that delivers remarkable strength and energy efficiency. And, unlike some other insulations, Preservation Integra breathes, so moisture is wicked away to resist water retention.

INVITING, CLASSIC STYLING MAKES IT HOME

Preservation's Integra captures the timeless look of traditional plank siding for superior style and performance.
